

Canon EOS Rebel G Lens Connector Replacement

Replace the Lens Connector in your Canon EOS Rebel G.

Written By: Zach

INTRODUCTION

This guide shows you how to install a new lens connector.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Front Panel

- Using a #00 Phillips screw driver, remove three 4.4 mm Phillips screws as indicated by the red circles.

Step 2

- Using your finger, peel back the textured grip so the components are separated.

Step 3

- Using the flat end of a spudger, loosen the connection between the front panel and the device.
- Remove the front panel using your hands.

Step 4 — Lens Connector

- Using a Phillips #00 screwdriver, remove the 5 indicated screws
 - Five 6.2 mm Phillips screws

Step 5

- Using your hands, remove the top black ring.

⚠ WARNING! The indicated piece is spring loaded. Prepare for it to eject when taking off top ring.

- Spring located here.

Step 6

- There are two silver metal rings.
- Remove the top silver metal ring.

Step 7

- Remove the bottom silver ring.

To reassemble your device, follow these instructions in reverse order.
